## MEDICATION ASSISTED TREATMENT (MAT)

CleanSlate offers a variety of medications including but not limited to Buprenorphine (opiate dependence) and Vivitrol (opiate/alcohol dependence).

## CASE MANAGEMENT

Case managers are part of the interdisciplinary team who help patients identify their underlying barriers to recovery and connect them with resources and referrals to overcome those barriers. Barriers can include but are not limited to transportation, child care, employment, housing, and medical needs.

## PREGNANCY TREATMENT

CleanSlate offers specialized drug or alcohol treatment for women who are pregnant or have recently given birth. Our physicians develop a patient-centered treatment plan to improve outcomes for both you and your baby.

## HEPATITIS C TREATMENT

Hepatitis C is a serious health issue, especially among those battling addiction. Shockingly, 1 in 3 people with Hepatitis C are unaware of their infection. Our Hepatitis C testing and treatment are available to anyone in addiction treatment with us. We boast a cure rate of over 95%.

# WHAT TO EXPECT AT YOUR FIRST APPOINTMENT WITH CLEANSLATE

**Welcome to CleanSlate! We're glad you're here.** Whether or not this is your first time in treatment, we know you may be nervous. Please know every member of our staff is rooting for you. Here are a few things you may want to know about your first appointment.

## WHAT YOU'LL NEED

**ARRIVE 30 MINUTES EARLY**

**BRING INSURANCE (IF APPLICABLE) & PHOTO ID**

**BE PREPARED TO GIVE A URINE & BLOOD SAMPLE**

## WHAT YOU'LL DO

### **YOU WILL MEET WITH OUR CLINICAL TEAM**

You will meet with a doctor, nurse practitioner or physician's assistant at your first appointment. Depending on the CleanSlate location, you may also meet with a counselor.

### **YOU MAY RECEIVE TREATMENT ON YOUR FIRST DAY**

After your behavioral health and medical assessment is complete, your clinical team will determine if medication that same day is appropriate.

### **YOU WILL FIND OUT WHICH MEDICATION PLAN IS BEST FOR YOU**

CleanSlate provides medication-assisted treatment using FDA-approved medicines. Prescriptions are tailored to each individual's care needs. Our treatment may include: Buprenorphine/Naloxone products such as Suboxone, Zubsolv or generic; Buprenorphine injectable products such as Sublocade or Brixadi; or Naltrexone products such as Revia, Vivitrol or generic. Your doctor will determine which medication is best for your unique needs.

## WHAT HAPPENS NEXT

### **YOUR APPOINTMENT SCHEDULE WILL BE BASED ON YOUR CARE NEEDS**

For the first two weeks with CleanSlate, you should expect to have 2–3 appointments per week. This will help you stabilize in your treatment and also on your medication. During these first two weeks, you will also attend an orientation group to learn more about the program.

### **YOU WILL HAVE ACCESS TO OTHER SUPPORT SERVICES**

Because addiction often has deep roots, we also treat for uncomplicated anxiety and depression associated with substance use disorder. For patients with complex psychiatric conditions, we will refer you to a psychiatrist for management but will still treat the substance use disorder once the condition is stable. We also treat for hepatitis C.

We also understand pregnant patients have specific needs; we prescribe Buprenorphine/Naloxone for opioid use disorder. CleanSlate will also connect you with community resources to support you throughout your pregnancy.
